M. Akhdan Ramadhan

Computer Engineering Technology Student | Automation & AI Systems

Bogor, Indonesia | m.akhdanramadhan@apps.ipb.ac.id
github.com/makhdanramadhan-ui | makhdanramadhan-ui.github.io

PROFILE

Computer Engineering Technology student at IPB University with hands-on personal projects in Node.js and Python automation, AI-assisted workflows, API integration, and serverless services. Builds background tools with persistent state, scheduled tasks, and Telegram notifications. Interested in freelance automation, backend integrations, and AI tooling.

TECHNICAL SKILLS

Languages: JavaScript / Node.js, Python, PowerShell, SQL

Automation & AI: LLM API integration, prompt design, Puppeteer, Telegram Bot API, n8n

Cloud & Data: Cloudflare Workers, Cloudflare D1, SQLite, Docker Compose

Systems & Tools: Tailscale, REST APIs, process monitoring, FFmpeg, MacroDroid, Git

SELECTED PERSONAL PROJECTS

Reddit Job Discovery & Proposal Assistant

Node.js / RSS / LLM API / SQLite / Telegram

- Built a scheduled service that filters public hiring feeds for development and automation opportunities.
- Integrated AI proposal drafting and quality review; delivers drafts and post links to Telegram for manual submission.

Cross-Device Bot Server Controller

Node.js / PowerShell / Tailscale / SQLite

- Built a one-click desktop/laptop handoff tool for three background agents over a private network.
- Coordinates peer-process shutdown, state and session-file transfer, service startup, and health checks.

Serverless Expense Tracker & Device Locator

Cloudflare Workers / D1 / MacroDroid / Telegram Bot API

- Connected Android banking notifications to a serverless API and SQL storage through webhooks.
- Added Telegram-triggered reporting of phone GPS coordinates and battery information.

Automated Video Processing Pipeline

Node.js / FFmpeg / LLM API / SQLite

- Built a pipeline for vertical video rendering with blur-padding, audio mixing, and text overlays.
- Connected AI-assisted hook generation, job-state tracking, and Telegram controls for batch processing.

EDUCATION

IPB University (Institut Pertanian Bogor)

Computer Engineering Technology | Current student

Areas of study: computer systems, networking, embedded systems, and IoT.
